Résumé

Abstract
The abstract should concisely present the research context, objectives, methodology, key results, and main conclusions.

Keywords : Applied research, Agriculture, Health, Living environment, Environmental modelling

1 Introduction

This section should introduce the research problem, its applied relevance, and the objectives of the study. Authors are encouraged to clearly state the societal, environmental, or health implications.

2 Materials and Methods

Describe the study area, data sources, experimental design, and analytical or statistical methods. This section must ensure reproducibility.

3 Results

Present the main results using figures and tables where appropriate.

TABLE 1 – Example of results table

Variable	Value	Unit
Soil organic carbon	1.85	%
Crop yield increase	23	%

4 Discussion

Discuss the results in relation to existing literature and highlight practical implications for policy, management, or decision support.

5   Conclusion

Summarize the main findings and outline perspectives for future applied research and implementation.

Acknowledgements

(Optional) Acknowledge funding institutions, research programs, or individuals.
